

Xiaowen (Winn) Ge

RESEARCHER IN MUSIC EDUCATION AND CREATIVITY

Edinburgh, UK · winn_g@outlook.com · ORCID: 0009-0004-3830-9481 · ge-xiaowen.github.io

PROFILE

PhD in Education (University of Glasgow, 2024) on how music teachers in China perceive creativity. Qualitative researcher in music education and creativity, with expertise in interviews, video-recorded observation and thematic analysis. Guest lecturer in qualitative methods at the University of Liverpool.

RESEARCH FOCUS

Creativity in music education — core PhD strand: drew on Csikszentmihalyi's Domain-Field-Individual model (the Field as the gatekeeper selecting which novelty is transmitted) to study how examinations, the curriculum and teachers' own training shape their views of creativity, and developed a practice-informed model of teachers' perceptions of creativity, built around a seven-phase Spectrum of Music Education. China's curriculum standards name three areas of creative work: exploring sound, improvisation and composition. Published in *Research Studies in Music Education* (2026); a second article, on the influence of policy and experience, is published online in *Music Education Research* (2026).

Independent project

Syn-Aesthetica (2025–present). Self-initiated and unfunded, with jewellery-design collaborator Dr Dong Ding, Edinburgh College of Art. Prototype-stage Python/C++ tool designed to combine librosa feature extraction with a self-trained lightweight emotion classifier (public affective-music datasets) to drive physical, kinetic output via Dr Ding's sculptural mechanisms. My role: analysis pipeline, classifier training and the educational-evaluation framework.

TEACHING EXPERIENCE

Guest Lecturer, University of Liverpool 2024–present

Design and deliver standalone workshops on scoping reviews, thematic analysis (NVivo) and publication pathways for postgraduates in VR/generative-AI pedagogy and digital humanities; invited back each cohort following direct faculty feedback that the applied focus of the teaching visibly increased students' engagement and equipped them to apply the methods in their own dissertations.

Workshops and guest teaching reach approximately 60 undergraduate and postgraduate students to date, including method-specific teaching for postgraduate researchers (5 PhD) covering question framing, ethics applications, fieldwork design and write-up.

Freelance Museum Educator, National Museums Scotland; Hunterian Museum, University of Glasgow 2018–present

Research, write and deliver interpretation for school, university, public and international audiences; train and assess new guides.

Thesis: *Music teachers' perceptions of creativity in the context of twenty-first century Chinese education* (viva 27 September 2023; [full text](#)). Supervisors: Prof Oscar Odena, Prof Kay Livingston.

Qualitative design: 17 semi-structured interviews, 24 lesson observations, critical-incident charting, researcher diary; thematic analysis in NVivo. Produced a practice-informed model of teachers' perceptions of creativity, including a seven-phase Spectrum of Music Education. Key finding: conservatoire-trained instrumentalists received formal improvisation training; generalist teachers engaged with it only informally.

Dissertation: *The Role of Higher Education in Youth Transition to Employment*. Mixed methods, SPSS.

Dissertation: *The Application of Task-based Language Teaching in IELTS Teaching*. Undergraduate research project (project lead, 4-person team): *An Analysis of Common English Learning Methods and Their Uses* — funded by a Taishan Medical University internal research grant (¥3,000).

CONFERENCES & PRESENTATIONS

Quality and Aesthetics in Music Teachers' Perspectives. ISATT 21st Biennial Conference, Glasgow, 2025.

Exploring Multimodal Communication in Music Education. LKALE SIG / BAAL Conference, 2024.

Chinese Music Teachers' Perceptions of Fostering Creativity: The Contradiction Between 'What I Should Do, What I Can Do, and What I Am Asked to Do'. RiME 2023 Conference Proceedings.

Using Digital Tools to Bridge the Distance Divide. University of Glasgow PhD-led Webinar, 2020.

Reviewer, *Learning Environments Research* (Springer Nature).

METHODS & TOOLS

Qualitative: semi-structured / video-elicited interviews, observation, thematic analysis, NVivo, PRISMA scoping reviews.

Computational: Python (librosa for music-feature extraction).

Languages: Mandarin (native), English (fluent).

Musical practice: 20 years' piano training; 13 years' vocal training in traditional Chinese folk song singing.
